

AHMET YUNUS TURNA

Game Developer / Computer Engineer

Istanbul, Turkey | +90 534 743 57 17 | ahmetyunusturna@hotmail.com | [linkedin.com/in/ahmetyunusturna](https://www.linkedin.com/in/ahmetyunusturna) | [yunusturna.github.io](https://github.com/yunusturna) | yunusturna.itch.io

EXPERIENCE

Arvis Games, Remote · [UFC:MANAGER on the App Store](#) 02 / 2026 - 08 / 2026
Intern Game Developer

- Contributed to an officially licensed UFC mobile game as a Unity developer, working in a large production C# codebase.
- Built a layered MVC-style architecture using dependency injection and a signal-driven design, keeping gameplay, UI, camera and VFX subsystems decoupled and testable.
- Developed a config-driven content system using ScriptableObjects and custom Unity Editor tools, letting designers tune balance and author content without code.
- Built a unified reward and progression pipeline handling generation, persistence and presentation in one flow, and refactored monolithic controllers into modular command pipelines.
- Applied SOLID principles, object pooling and async patterns to hit mobile performance targets, iterating weekly with designers and artists.

UDO, Remote 07 / 2025 - 08 / 2025
Intern Game Developer

- Developed games in Unity and C# with a focus on optimization.
- Gained hands-on experience with game design fundamentals such as game loops, level balancing, and player retention strategies.
- Built in-game editor tools to streamline development and improve designer workflow.

Genarion, Remote 11 / 2024 - 07 / 2025
Intern Unity Developer

- Created Unity DB infrastructure and environment designed by the project team meant to serve the LLM based NPC speech-engine.
- Created game environment, assets and mechanics designed by the project team.

Türkiye Entrepreneurship Foundation, Remote 09 / 2024 - 08 / 2025
Project Management Intern

- Managed and led a community of over 2,000 participants as an intern at the AI and Technology Academy.
- Planned and executed engaging events to foster collaboration and communication among members.

Stak Games, Remote 12 / 2023 - 10 / 2024
Jr. Game Developer

- Designed and developed core gameplay mechanics and player-map interaction systems for various games.
- Implemented player-UI interaction systems and optimized gameplay features across multiple projects.

Undoco Games, Remote 06 / 2023 - 12 / 2023
Co-Founder & Game Developer

- Managed project planning and execution using Trello, Figma, and Notion, securing selection into the BUG-Lab Tekmer Pre-incubation program.
- Developed multiplayer player-map and character interaction systems across various maps.

PROJECTS

Smart Dog Collar Graduation Project | Flutter, ESP32, Firebase
Capstone IoT wearable streaming ESP32, MPU6050 and GPS sensor data to a Flutter app over Bluetooth Low Energy, with Firebase cloud sync.

Check and Defend Strategy | Unity, C#
Chess tower-defense where every wave randomly flips the player between defender and attacker; won first place in a game jam.

MonoShot Puzzle | Unity, C#
Retro-style mobile game where players drag a ball to shoot it at the goal, with three chances per level and progressively harder stages.

MergeSquare Puzzle | Unity, C#
2D mobile puzzle where players reconstruct scrambled images within a limited move count across increasingly difficult levels.

MazeRoll Puzzle | Unity, C#
Mobile maze puzzle where players navigate complex mazes using distinct ball types and strategic power-ups to reach the exit.

Madis Strategy | Unity, C#
Dice-based strategy game built for a game jam, combining chance and strategic depth in a dark, atmospheric setting.

SKILLS

Engine and Languages: Unity, C#, Flutter, Dart

Architecture and Patterns: Dependency Injection (Zenject), SOLID, MVC, Signal / Event-Driven Design, Object Pooling, ScriptableObjects

Unity Ecosystem: Custom Editor Tools, UniTask, R3 (Reactive Extensions), DOTween, Unity Profiler, Addressables, Mobile Optimization

Tools and Platforms: Git, GitHub, Trello, Notion, Figma, Firebase, Android

Languages: Turkish (Native), English (B2)

EDUCATION AND CERTIFICATIONS

Doğuş University, Istanbul, Turkey 09 / 2022 - 06 / 2026
Bachelor of Science in Computer Engineering, Full Merit Scholarship (100% tuition)

VSB - Technical University of Ostrava, Ostrava, Czech Republic 02 / 2024 - 06 / 2024
Erasmus+ Exchange Semester, Faculty of Mechanical Engineering

Certifications: Google Project Management Certificate

ACTIVITIES AND LEADERSHIP

GDG On Campus Doğuş University, Game Development Team Lead 09 / 2025 - 06 / 2026
Led a game development team to design, build and release 5 distinct games; won first place in a game jam with "Check and Defend".

GDG On Campus Doğuş University, President 08 / 2024 - 07 / 2025
Managed a student club by organizing podcasts, workshops and conferences, and led strategic planning for technology competitions.
Established two dedicated teams focused on mobile and web development.

Google Game and Application Academy, Trainee 12 / 2022 - 06 / 2023
Developed interactive games using Unity and C#; achieved first place among 300+ teams in the bootcamp.
